

DOCK 'N' LOCK[®]

BY SURE-LOCK 

Introducing the Dock 'N' Lock[®]

The innovative, new Dock 'N' Lock Securement System from Sure-Lok gives individuals with special needs the freedom to get behind the wheel and drive. The system's unique design allows for easy docking and the dual-locking arm mechanism minimizes movement for maximum protection and comfort. The compact dock module – measuring 6-by-9 inches – offers greater maneuverability for a larger variety of wheelchairs. And the low-profile wheelchair bracket provides maximum ground clearance, making it easy to clear everyday obstacles like uneven surfaces, thresholds or carpets. The Dock 'N' Lock System gives users the accessibility they need to confidently lock in and drive without assistance.

Dock Module

This 6-by-9 inch base provides a smooth entry and superior stability for the wheelchair user, thanks to its unique dual-locking arm mechanism.

Wheelchair Bracket

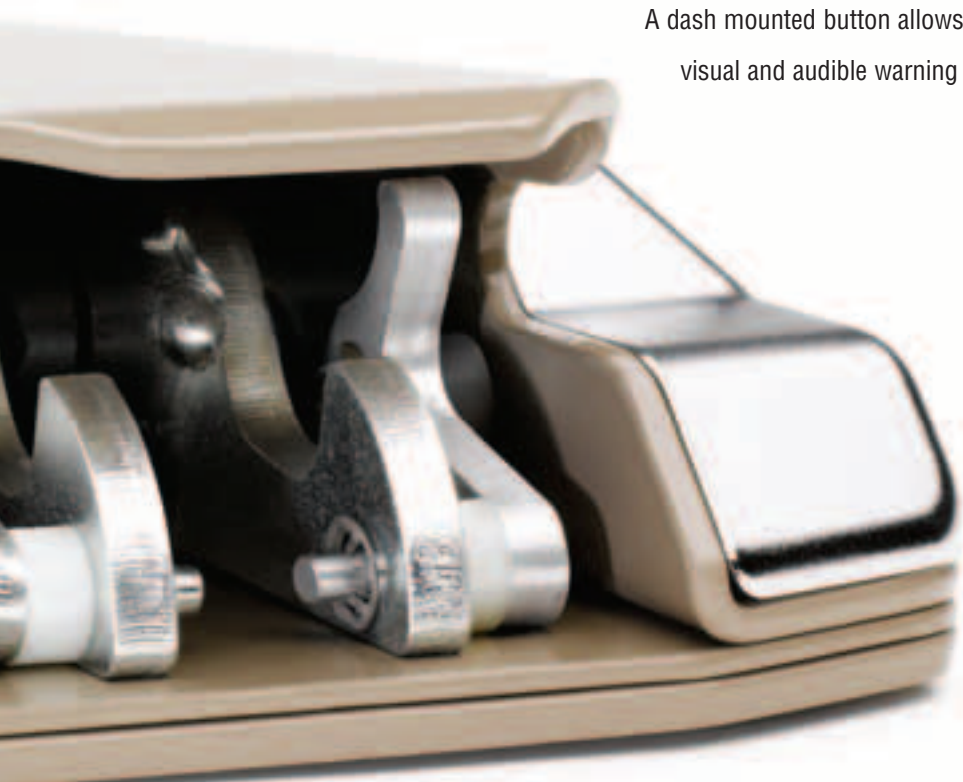

The low-profile bracket prevents snagging on uneven, real-world surfaces for more maneuverability.

Fixed Sub-Plate Mount

The plate provides the installer with increased accessibility to the unit and requires minimal labor.

Securement System from Sure-Lok.

One Button Electrical Release

A dash mounted button allows for a quick release of the wheelchair and has visual and audible warning indicators. A manual release is also available.

Elevation Plates

These plates stack to easily adjust the dock module to the proper height.

Top Safety Rating

Meets 30mph/20g Impact Test Criteria in both forward and reverse mount positions as per SAE J2249 and ISO 10542 Standards.

Warranty

Dock 'N' Lock comes with a two year warranty and requires no preventive maintenance.

Dock 'N' Lock Components

Dock 'N' Lock Docking Station – SLD901
Kit consists of Dock Module, Remote Electrical Release Kit, Master Control Box & Harness Kit, and Hardware.

Dock Elevation Spacer Plates – SLD950-3
Additional Elevation Spacer Plates are available for adjusting the height of the Dock Module.

Adjustable Mounting Plate – SLD902
Mounting Plate allows forward and backward adjustment to the Dock Module during installation.

Flexible Seat Belt Stalk Conversion Kit – FE201044
Stalk attaches to L Track in the floor and stands approximately 20 inches for easy access to buckle.

Remote Electrical Release Kit – SLD901-5
Additional optional Electrical Release Kits available.

Remote Cable Release Kit – SLD903
Optional Manual Release for use when Electrical Release is not enabled.

Power Wheelchair Bracket Kit – SLD950
Bracket attaches to the mobility device's base and latches into the Dock Module. Bracket design varies per wheelchair. Contact Customer Service for specific brackets and part number information.

Manual Wheelchair Bracket Kit – SLD920
Bracket attaches to the mobility device's base and latches into the Dock Module. Bracket design varies per wheelchair. Contact Customer Service for specific brackets and part number information.

Sure-Lok is committed to providing customers safe and secure wheelchair tie-downs and occupant restraint systems. Passenger safety is our first priority, which is why we design and manufacture the highest quality products in the industry.
